

### **Black Metal and Wooden Foot Stool**

**These are often used by Classical Guitar players.**

**We are finding that many Mountain Dulcimer players like these too! Mountain Dulcimer players can stabilize their dulcimers on their laps easier if 1 foot in on the foot stool. The foot stool raises your lap just enough to make it easier to keep your instrument on your lap.**

**These are especially nice for the short leg players. This gives them 1 foot that is not on tiptoe while trying to play.**
